

To the Members of the California State Assembly:

I am returning Assembly Bill 2633 without my signature.

I appreciate the environmental damage that can be caused by the inappropriate handling, transport and disposal of grease, including how this product can foul our land, rivers, and oceans. The California Department of Food and Agriculture has a system of regulating grease hauling while the Integrated Waste Management Board regulates waste. We have existing regulatory authority to address this issue. I am directing the Department of Food and Agriculture in coordination with the Integrated Waste Management Board to review and upgrade its existing system to improve the tracking and enforcement of laws governing disposal and transportation of restaurant grease.

Sincerely,

Arnold Schwarzenegger
